

NEW AWARDS FASTER, SMARTER, SAFER

Cut the time and effort of
delivering new awards

www.equatex.com/falcon

CERTAINTY WITHOUT THE HEADACHES

At Equatex, part of the Computershare group, we understand the complexity involved in delivering new awards. We also understand the importance of having a fully auditable trail to remain compliant. That's why we have introduced EquateFalcon, the powerful new awards engine for EquatePlus.

Spreadsheets and error-prone manual calculations are simply no longer suitable practices for international corporations today.

Audit requirements and the cost of managing complicated rules mean that organisations are turning to EquateFalcon for the robust, streamlined solution they increasingly require.

EquateFalcon enables you to deliver new awards without the headaches. It significantly cuts your workloads and removes the complexity of new awards with all the certainty of a fully auditable process.

Streamline your global compensation plan management

DELIVER NEW AWARDS EFFORTLESSLY

EquateFalcon is the powerful new awards engine for EquatePlus and comes with a fully supported set-up service from a dedicated team of experts. It is designed specifically for complex multi-jurisdiction schemes with extensive levels, rules and exceptions.

FASTER

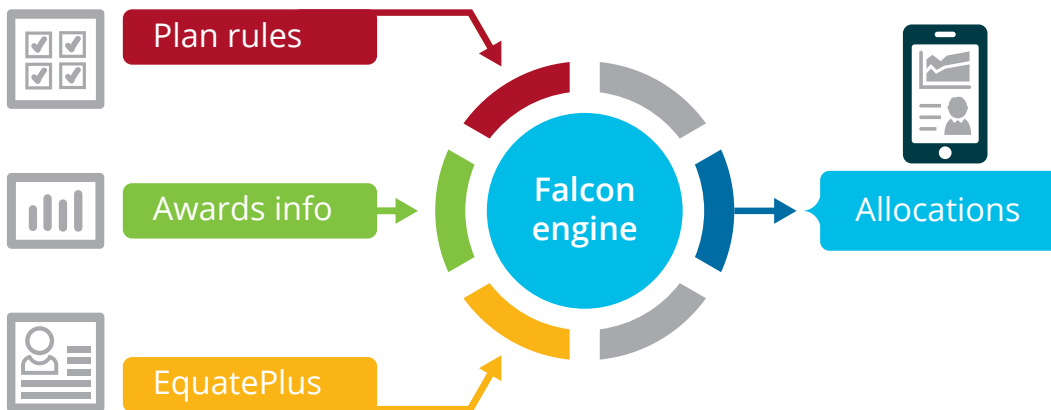

- Eliminate manual effort
- Fast, reliable automated calculations
- Transfer data directly from and to EquatePlus
- Any complexity of rules, jurisdictions and plan types
- Manage exceptions with ease

SMARTER

- Free your administrators to focus on oversight
- Flexible modelling and forecasting
- Reporting at any level of detail
- Collaborate across borders with data in a single point
- Award segmentation for accounting and reporting

SAFER

- Fully supported set-up
- All your plan rules documented and tested
- Built-in validation and quality control
- Reduced errors and risk from manual processes
- Full audit trails and history
