

Equity and non-equity based compensation plans

Give your participants access to their plans anytime, anywhere, on their devices.

equatex.com/mobile

For the mobile-first generation

Today eight out of 10 people access the web on multiple devices, increasingly mobile first.

Now your participants can keep up to date with their portfolio, enter trades and never miss plan related events or opportunities again - all straight from their smart phone.

Protected by state-of-the-art security, the full featured app is available for Apple (iOS) and other (Android devices) mobile operating systems.

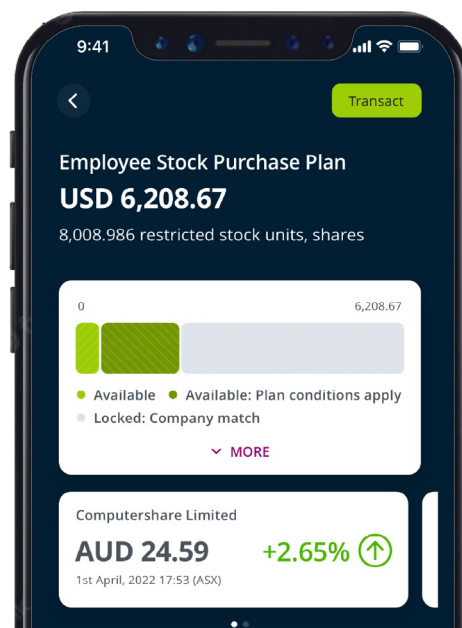

Unlock real-time mobile access to your plans

Our mobile app provides smartphone access to your plan participants. The app offers powerful features as standard, including real-time views of portfolio values, events throughout the plan lifecycle and even trading. You can also enhance user experience by switching on advanced options, from push notifications and tax at vest, to purchase plan elections.

Download our mobile app
